

JIXEL-RADIO is a solution for the radio broadcasting of alert messages to the population. When integrated with JIXEL-ALERTER, it offers an easy and efficient way for mass alerting system with clear and direct audio messages. Featuring a versatile multilingual text-to-speech engine, it is perfectly suitable for touristic regions or when international events are held.

Prepare and send a CAP alert message with ALERTER

JIXEL-RADIO converts the CAP message in a spoken message and broadcasts it

All standard radio devices become alerting tools and play the message
